M 1:50

This side elevation drawing shows the bridge deck and railing. The railing is composed of vertical glass panels held by a metal frame. Silhouettes of people are shown walking on the deck to provide a sense of scale. The drawing is oriented horizontally, with a north arrow pointing upwards. The scale is indicated as M 1:50.

Technical drawing of a bridge cross-section at M 150. The drawing shows a bridge deck with a central span and two side spans. The central span has a width of 17.80m, and the side spans have widths of 1.70m each. The bridge is supported by three piers. The left pier has a width of 1.70m and a height of 4.00m. The right pier has a width of 1.70m and a height of 4.00m. The bridge deck has a thickness of 0.30m. The drawing includes various elevation points and dimensions. The scale is M 1:50.
